

IT TAKES DIFFERENT PERSPECTIVES TO KEEP INNOVATING

ARE YOU PURSUING AN ENGINEERING, MATH, OR SCIENCE DEGREE?

You don't need a degree in finance to make an impact at Goldman Sachs. If you're passionate about working on projects that make a positive difference, this is a great place to start your career. Here, you'll work alongside some of the most accomplished professionals with diverse backgrounds such as Math, Science, Engineering and Finance. And because we believe in the merit of good ideas – no matter who they come from – you'll have the chance to contribute early on.

The Goldman Sachs Securities Division enables our clients to buy and sell financial products, raise funds and manage risk. We make markets and facilitate client transactions in fixed income, equity, currency and commodity products as well as in major stock, options and futures exchanges worldwide. The Securities business is a leader in employing quantitative analytics to solve complex problems for clients and the firm.

JOIN US FOR: SECURITIES DIVISION STEM INFORMATION SESSION - Yale

Attend the Securities Division STEM Information Session to learn about how people with similar backgrounds are building careers in a financial services firm like Goldman Sachs.
